Stacks Tower Review Group  
Sept. 21, 2010  
AGENDA

1. **Estimate the ingest of new volumes to the Woodruff Stack Tower:**

   Content report:  
   - 1,324 serials volumes  
   - 34,637 monographs (including Music and Media, Chemistry, Ref)  
   
   Note: for the current FY10 fiscal year  

   Stacks estimate: 4,000LF a year

2. **Yield - Possible titles to be sent from stacks to Storage**

   Bib count: 32,500 books published 1970-1975 with 0 check-outs  
   
   Consideration: is this close enough? We think so, but Mel will review the estimates (see below)

3. **Stacks Simulator** - Mel will check with Stacks staff to get a better sense of the actual volume count

4. **Workflow – thoughts and considerations**

   a. approach: target the 32,500 for this year  
   b. start with K and L  
   c. consult with Liz and Chris on J’s and L  
   d. two tier approach: 32,500 project and a "hot spots" project (such as DS)  
   e. policy changes: send major gifts to storage; low use language materials?  
   f. bound vols.: proportion in the stacks is still high; they are hard to identify through EUCLID reports  
      (difficult to tell what is on-line) - consult with Lola, is there a way to produce a better list for bound vols.?

   **Next steps:** Chuck will set up meeting with Chris, Liz, and France in the new 2 weeks  
   Tim will consult with Lola on the list for bound vols. issue

Present: Mel, Ann Vidor, Tim Bryson, Chuck S., Amy
